Thematics					
OS		OpenFAST Version		Interface	

What do you use OpenFAST for ?

How did you set up your model ? If not from scratch did you start from a reference case in the NREL's github ? Which one ?

What modules do you mostly interact with ? Are their modules you use but have never or only lightly modified from source ?

What type of environmental conditions do you use ? How where they chosen ?

What type of difficulties have you encountered setting up the model ?

Would you be interested in a training session or tutorials with OpenFAST ?

Yes: No:

If so, are there any specific aspects you would want to dig into ?
